English Protect your neighbors from the radio interference coming from your free energy device or risk disturbing the utility grid and getting a visit from the FCC.

Summary

Description **English:** This is a schematic (<https://ufile.io/7sidu1df>) of a Micro-Cap simulation (<http://www.spectrum-soft.com/index.shtm>) of a free energy device located near a power line which is rapidly extracting current from it instead of leaving it alone. It can't help itself.

	This is why it must be shielded (such as: with a Faraday cage) or located far away from the electric utility grid's transmission lines.
