English Protect your neighbors from the radio interference coming from your free energy device or risk disturbing the utility grid and getting a visit from the FCC.

Summary [edit]

Description	English: This is a schematic of a Micro-Cap simulation of a free energy device located near a power line which is disrupting the power grid by <i>adding energy to the grid</i> rather than stealing from it. This is why this type of device must be shielded (such as: with a Faraday cage) or located far away from the electric utility grid's transmission lines.
