CAPACITOR, C1, IS DRIVING ITS VOLTAGE AGAINST THE VOLTAGES OF THE TWO VOLTAGE SOURCES. THUS, THE CAPACITOR IS ACTIVE, HERE, RATHER THAN PASSIVE AND DOMINATES (SUPERSEDES) THE VOLTAGE SOURCES. CONSEQUENTLY, I MUST ASSUME THAT THIS CAPACITOR HAS BECOME A VOLTAGE SOURCE OF ITS OWN CREATING FREE VOLTAGE!

MEANWHILE, THE AMBIGUOUS ROLE OF THIS SELF-SHORTED TRANSFORMER CAUSES A BIDIRECTIONAL FEEDBACK OBLITERATING ANY DISTINCTION IT MAY HAVE WHENEVER IT IS NOT SHORTED. NAMELY, IT PROVIDES A STEP-UP TRANSFORMATION AS WELL AS A STEP-DOWN.

HENCE, THIS SELF-SHORTED TRANSFORMER PROVIDES A CONVERSION OF THE CAPACITOR'S FREE VOLTAGE INTO FREE CURRENT AND POWER!

Summary [edit]

Description	<p>English: This is a segregated analysis of each electrical component within Pavel's generator in an attempt to discover if there is any inversion of voltage or current which may indicate the generation of <i>free voltage</i> or <i>free current</i>. If any of these inversions are found, then this means that the electrical components which are hosting these inversions are no longer passive components (according to passive sign convention), but have become <i>active components</i> without assistance from <i>any prime mover</i>.</p> <p>By definition, a prime mover is an energy source which <i>has to</i> inject its energy into a device from <i>outside</i> of that device. This conventional requirement, which we make upon <i>all of our appliances</i>, makes it possible for us to deny whether the colloquialism known as <i>free energy</i> and <i>overunity</i> actually exists. But as you can see, at least in theory, <i>Conservation of Energy</i> is restricted in its scope applying exclusively to situations that require a prime mover to supply all of a device's power without any generation of additional power arising from the device, itself. This, of course, is a rule of thumb – not a rule of Law, since amplifiers are well-known instruments of magnification.</p> <p>Herein, this simulation, is no exception. Amplifiers are by no means non-existent. To insist that amplifiers also be under-achievers is nothing less than a straitjacket of conformist domination made upon <i>free thought</i> and <i>free action</i> among <i>free people</i>.</p>
