Captions Edit

English Pavel's Generator (aka, MrPreva), version two.

Summary [edit]

	Description	English: This variation of Pavel's generator also does not need any prime mover acting as a source of power to maintain its generation of electricity, because a momentary burst from a sine wave generator of 1μV is sufficient enough to initiate its escalation towards infinite oblivion! But unlike File:Pavel-generator.png, this version uses a transformer wire gauge of 19 AWG or less and a mutual coupling coefficient greater than 52.08% to achieve its gainful <i>overunity</i>.

Metadata

This file contains additional information such as Exif metadata which may have been added by the digital camera, scanner, or software program used to create or digitize it. If the file has been modified from its original state, some details such as the timestamp may not fully reflect those of the original file. The timestamp is only as accurate as the clock in the camera, and it may be completely wrong.
