Summary

This file is **translated using SVG `<switch>` elements.** All translations are stored in the same file! Learn more.

For most Wikipedia projects, you can embed the file normally (without a `lang` parameter). The Wikipedia will use its language if the SVG file supports that language. For example, the German Wikipedia will use German if the SVG file has German. To embed this file in a particular

language use the `lang` parameter with the appropriate language code, e.g. `[[File:Mu-metal cable.svg|lang=en]]` for the English version. Do not specify a `lang` parameter if it is not needed. The parameter may prevent the use of a subsequent translation.

To translate the text into your language, you can use the SVG Translate tool. Alternatively, you can download the file to your computer, add your translations using whatever software you're familiar with, and re-upload it with the *same* name. You will find help in Graphics Lab if you're not sure how to do this.

Description	**English:** Mu-metal cable construction **Français :** construction d'un câble en Mu-métal **Deutsch:** Aufbau eines Mu-Metall-Kabels
Date	16 January 2009

Metadata

This file contains additional information such as Exif metadata which may have been added by the digital camera, scanner, or software program used to create or digitize it. If the file has been modified from its original state, some details such as the timestamp may not fully reflect those of the original file. The timestamp is only as accurate as the clock in the camera, and it may be completely wrong.

Short title	Mu-metal cable
