

Seeking the Big Picture view

Adrian Marsh has expertise in both standard and esoteric energy systems.

JEANE MANNING

JUN 05, 2026

Adrian Marsh, PhD, is one of the star speakers at the 2026 Energy Science and Technology Conference ([ESTC](#)) in Washington state, USA, this month.

When at home in England, he moves in two worlds.

His Cambridge university education qualified him to work on superconductors, semiconductors and quantum effect devices. That launched a career in engineering.

Today, his successes in that conventional world allow him the independence to explore far beyond conventional science.

The “explore far beyond...” part began early for Dr. Marsh.

Conventional Science

The Exploration of Form ...

- Good exploration of the 10th physical world, or the Form side of Life.
- Seeks to answer:
 - What form is made-of ...
 - How form inter-acts ...
- Application of physical theories, principles, and properties.
- Considered to be "objective" because the observer's Perception (Assemblage Point) is NOT included/considered ...
- E.g. Electromagnetic spectrum.

The New Science

The Quest for Knowledge ...

- An experiential exploration of the Great Manifestation across all of the 10 worlds.
- Seeks to study and reveal the great problems of the Physical and Spiritual Universes.
- The Why, Purpose, and Principles of our spiritual, esoteric, and physical existence.
- Under-stand (support), apply, and resonate with, the principles of the Wheelwork of Nature ...
- E.g. Aetheric spectrum ...

On left side, Dr. Marsh included symbols from his Toltec science research.

Following is an excerpt from an autumn 2024 article in Nexus magazine, which I wrote after interviewing Dr. Marsh:

At 25 years of age he had accomplished much of what he had aimed to do, and was left with questions about the purpose of life. As a result, he has been on a journey of personal development for half of his fifty-some years.

And at that same young age, he renewed his interest in concepts such as an aether, and basics of what he calls New Science.

Now with his own laboratory, and in his own time, he helps uncover basic principles of electricity. You can see his [‘Wheelwork of Nature’ videos](#) online, for instance.

Regarding his *Wheelwork of Nature* series, he explains,

“Nikola Tesla said there will come a time when we learn to attach our experiments and apparatus to the very ‘wheelwork of nature,’ so somehow we have to come into synch with natural processes.”

What is New Science?

Conventional science has limitations, although it creates useful structures. “Conventional science is a very good expression of the *form* of life—what things are made of, how they’re made, and how they interact with each other on a physical level.”

New science, on the other hand, joins electricity and energy research with esoteric and philosophical questions, Dr. Marsh said. It explores the aetheric spectrum, yet today’s science studies only a small part of that spectrum.

It gets personal.

“When we formulate an experiment so that we are part of the experimental equation, then we are doing new science.”

Golden ratio

An experiment first done by Eric Dollard in 1974 and rediscovered by Dr. Marsh provides an eye-opener.

The Golden Ratio experiment is where you see electricity displaying an underlying fundamental natural order, Dr. Marsh said.

THE WHEELWORK OF NATURE

- Nicola Tesla - "... It is a mere question of time when men will succeed in attaching their machinery to the very Wheelwork of Nature."
- The Golden Ratio / Fractal Discharge - revealing fundamental underlying processes in Nature ...

The Toltec System of Knowledge ...

- Electricity or the Spirit is ever-present in all units of the One Life across the 10 dimensions.
- The Inner-Workings of Electricity can be defined in 3 distinct levels - Electric-fire (spiritual), Solar-fire (inclusive), Fire-by-Friction (differentiated).
- The properties as we know and measure them of every-day electricity arise from Fire-by-friction.
- Using an Inclusive Intent, and apparatus that is in Synchronicity with the Wheelwork of Nature, we can reveal Solar-fire properties of electricity which reflect fundamental principles within the One Life.

Dr. Marsh's organization created video for Jeane, of interview with him.

Fern-like fractal patterns of a specially-created electrical discharge show nature's preference for the Golden Ratio.

Mathematicians dating back into antiquity noticed that 1.6180339887... "mathematical constant" ratio and had other names for it, such as the Divine Proportion.

You're probably familiar with the Golden Ratio as expressed in an expanding logarithmic spiral. You see that geometric shape, and the ratio in measurements of structures, everywhere—

- in classical Greek architecture,
- in measurements of the Great Pyramid,
- in the curl of an ocean wave,
- the spiraling pattern on a pine cone
- or petals on a rose.

The Golden Ratio "has a harmonious balanced feeling, a power in it."

And electricity can display this underlying fundamental natural order!

Harmony with nature is the key

Don't look for "natural order" in electricity coming out of the wall plug. The grid isn't built for that.

In contrast, new-science experimenters create an electric discharge in a harmonious way which can only be done by setting up the conditions skillfully.

For example, the Tesla coil of a high enough frequency must create visible discharges and must be allowed to be in a natural resonant state with the generator.

"You don't push the coil to do what it doesn't want to do, or force it." Forcing the coil collapses the Golden Ratio Discharge.

"When you look at the symmetry...fractal self-repeating, self-similar expansion and the Golden Ratio expansion in the discharge, it's almost like a choreographed dance sequence....Almost like inherent intelligence is involved."

"So it is very reflective of the natural order."

An effect revealing Intelligence in nature can transform a worldview.

In my opinion, it's time for educators to bring such knowledge into the zeitgeist, to inspire and empower future generations for creating harmonious technologies and societies.

I believe young people benefit from observing reality, learning to think independently, and gaining respect for the natural order on Earth and in the cosmos.

As I see it, Dr. Marsh is a good role model, for students to develop balance in their lives—balance between the technological and the higher/nonphysical levels.

On the tech level, he freely shares results of experiments related to Nikola Tesla's discoveries.

He's also mentored experimenters by teaching how to calibrate and use proper measuring equipment so they can accurately measure what they may have viewed as revolutionary results of their experiments.

Later this month you can see his [live-streamed presentations](#) during the June 24-28 ESTC and at your leisure afterward.
