[Phase Two, Google Docs Link to view or download video.](#)

AI discussion: [shortened redirect URL](#); [full link](#). It began with this initial question:

Can a low-level capacitor be constructed of a strip of Saran wrap 1 meter long and a tiny strip of aluminum tape at either end?

Al's answer was: **yes**, but different than what I had already constructed for improved efficiency. So, I decided to quit for the day and post it.
