What does Charlie Lutes and William Lyne have to say about Aliens and UFOs?

EDITORIAL COMMENT: It is also suspicious that UFOs have been renamed as UAPs for reasons which are unclear.

Charlie Lutes has infrequently reported to those of us — who were devoted to showing up at his advanced lectures for Transcendental Meditators while he was alive — that the watchword across the Universe is: ***“Do not interfere with the human”***.

William Lyne has publicly proclaimed that the UFO crash at Roswell, New Mexico, in 1947, was staged by a bunch of privates (from a nearby military base) as an off-the-cuff spoof (a humorous imitation performed without preparation). This infuriated the Pentagon since the Pentagon

was not informed of this unplanned event in which a bunch of scrap metal was strewn across the desert in hopes of authenticating a crash site.

Usually, the Pentagon hires Hollywood scriptwriters, and other professionals in the entertainment business, to thoroughly and flawlessly craft any conspicuous UFO event which the Pentagon wants to “stage”.

They did a fairly convincing job of the Moon Landing, didn't they?

Did we ever go to the Moon?

The Pentagon had to quickly clean up the strategic mess which these low-level military personnel had created lest it turn into a nightmare once the public discovered the hoax and who had perpetrated it.

If left unattended, it would have destroyed the Pentagon's cover story (along with their credibility) — and would have neutralized our general confusion — concerning the growing incidence of sightings of UFO's which have been publicly occurring ever since the close of WWII.

A confused crowd is a body politic which can be readily manipulated.

A well-informed body politic cannot be easily manipulated with propaganda.

American Moon, 2017; a conspiracy theorist's documentary.
