Hemp combined with MSM and a trace quantity of silver ions in a base of a beverage of your choice. The hemp does not have to be combined with the MSM in a beverage. It need merely be combined in the stomach. So, it could be sprinkled on food and the MSM could be dissolved in the beverage along with the silver wire sitting at the bottom of the beverage container so long as the beverage container is not metallic. And I also prefer that it not be glass but it must not be metallic unless of course it's made out of silver!
